Zumra

Pool small. Invest together.

Sharia-compliant investing inside the BisB app

Presented by **Ali Fadhul and Abdulrahman Alshoubaili| Bahrain Polytechnic, Team 3**

Investing feels out of reach

Limited capital

Many products need large minimum amounts

Hard to find the right fit

Options are complex and scattered

Unclear risks and fees

People hesitate when they can't see them

Who is it for?

- Young professionals
- First-time investors
- Salaried savers with BD 10 to 500

Meet Zumra Pool

A feature inside the BisB app where people pool small amounts into one managed, Sharia-compliant portfolio.

Zumra Stable

Lower risk, steadier returns

Zumra Balanced

A mix of risk levels

Zumra Growth

Higher growth, higher risk

What is new

Start from BD 10

Monthly auto top-ups

Exit within 14 days

How Zumra works

1. Invest

Join in the BisB app from BD 10, add monthly

2. Pool

Funds go to a segregated pool, not a person

3. Manage

Licensed manager invests per portfolio policy

4. Earn

Profit shared pro-rata, net of fees

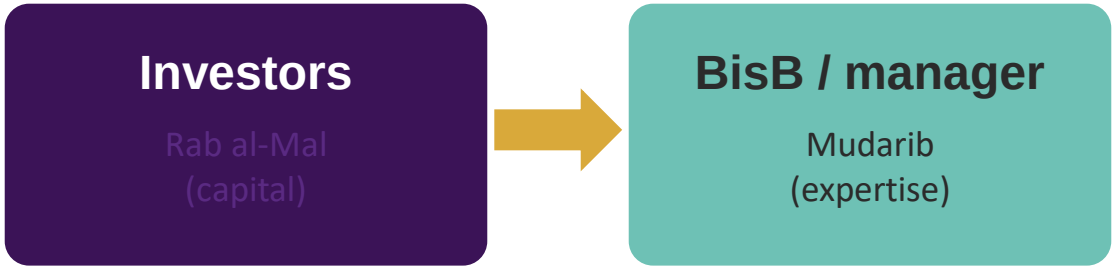

5. Exit

Request now, paid within 14 days

Example (illustrative)

BD 10,000	BD 800	BD 100	BD 8
pool	profit	you invest = 1%	your share (pre-fees)

Sharia structure: Mudarabah

Capital goes in, profit is shared at a pre-agreed ratio

Invested in Sharia-screened assets

- Sukuk
- Murabaha
- Ijarah
- Compliant equities

Why it is compliant

- Profit shared by agreed ratio
- No guaranteed return
- Losses borne by investors, not the manager (unless negligence)
- Assets free of riba and prohibited activities
- Approved by Sharia board

Why Zumra is different

	Typical today	Zumra Pool
Entry ticket	Often high minimums	**From BD 10**
Where	Separate platforms	**Inside the BisB app**
Saving habit	One-off lump sum	**Monthly auto top-ups**
Transparency	Fees and risks buried	**Risk, fees, performance in-app**

Real benefit: easy start, clear risk, full tracking in one app.

How BisB earns

1%

Annual management fee

On assets under management

2%

Share of investment profit

Under the Mudarabah ratio

New

Customers for BisB

Measured separately, not counted as revenue

Monthly contributions grow the pool, creating steady, recurring income

BD 1M

managed

= BD 10,000 / year

1% fee, before costs

Can it be done in Bahrain?

Technical

Built into the existing BisB app with KYC and a unit ledger

Operational

Licensed manager, custodian, periodic reports

Regulatory

Fits CBB collective investment rules, needs licensing and approvals

Main challenge: liquidity for 14-day exits

Solution: a cash and short-term Murabaha buffer, matching new inflows against exits, and a clear redemption policy

Impact and sustainability

Economic

More people investing, more savings channelled into the economy

Social

Financial inclusion: ethical investing for small savers

ESG

Screening can exclude harmful sectors; ESG-aligned Sukuk can be added

Impact is expected, not yet measured; BisB can track it after launch.

Why Zumra Pool?

New customers

Growing, recurring assets

Sharia-compliant and transparent

Investing for everyone, starting from BD 10.

Thank you. Happy to take your questions.
